Dear Sir / Madam,

Letter of support for Artificial Sports Pitch at Moat School Matson

I write to give my full support for a proposal for a new Artificial Grass Pitch (AGP) at the Moat School Matson which I believe will be a catalyst for more sport, better health and better concentration in lessons at the school.

The site of the AGP has been a challenge for the school for some time and transforming it into a community asset to be rented out of school hours is good for the school, the Matson Community and the project co-ordinator Bridge Football Academy.

As part of an overall campaign trend of Gloucester to be looking up this AGP would symbolize progress at the Moat and in Matson: which would be good for the school and the area.

The cost structure is clearly attractive to the school and planning (which would be sensitive on other green parts of the school site) should be straightforward.

So I have no hesitation in recommending this proposal.

Yours sincerely,

Richard Graham
